Hi Nuria,

Thank you for the information and sorry for the slow reply. It has been a busy day.

I appreciate the information below. It is very helpful.

Have a good night,  
 Jenny

Yes DEQ docs has data – below some I already identified – but just scratched the surface... ( which is why I would refer to the records center index list and not what is in Sharepoint – since they are the same documents.

Check the following documents to see if they are in that folder

doc27336418  
 doc27149440  
 doc27149426  
 doc27149424  
 doc27149419  
 doc27149414  
 Doc27468383  
 Doc27377145 (map)

There are summary letters to residents and a maps of sample locations.

Hi Nuria,

Thank you for the information, but this does not answer my question. I think my question wasn't clear. I will try to be clear. There is a folder on the Sharepoint site called "DEQ documents". It contains 286 files. Is there any data in that folder? I have gone through 80 or so documents and I haven't seen any data, but I am checking with you before I waste time going through more documents.

Thank you,  
 Jenny

Hi - I have not scrubbed the data to really understand what the Record Center did... but this is what I requested from the Record Center:

I gave them all of the DEQ documents that are now in your Share point – and asked them to index and sort them out. It is still a lot of documents in the disk that Record Center gave me back.. but there should be less than what it is sharepoint – because I think ( I was told) they would compile some of the documents.

I am not sure if the document I gave you has all the documents that were previously in the file.. I have a separate disk with all the documents we have in the records center Pre-PFAS discovery.

I hope that answers your question – otherwise let me know.

**Subject:** Question about the Wolverine files on the Sharepoint

Hi Nuria,

Quick question, I know you made the index for us and I still need to download the newly numbered files. I appreciate you have that done for us and I apologize for not downloading the files yet. However, I was looking in the SharePoint and I wondered if all of the data files are in the data folders or if there might be any additional data files in the DEQ documents folder? I ask because I am trying to make sure all of the data is located in one spot until I have the time to transfer the files. I was going through the DEQ documents folder file by file checking, but it is taking a little while (and I didn't initially realize there were two more pages...or another 186 files) and I thought it would be faster to ask.

Thank you,  
Jenny
